Tailored Meniscal Allograft for Small Joint Resurfacing

- Anatomy preserving surgical alternative - does not burn any bridges ¹
- Resilient fibrocartilage serves as an ideal graft ²
- Avoids complications inherent to synthetic alternatives ³
- Logical substitute for dermal allograft (where applicable)
- Pre-sculpted for optimal graft size and thickness

RESURFACING INDICATIONS:

TISSUE PROCESSED BY MTF BIOLOGICS

Established in 1987, MTF Biologics is a non-profit tissue bank with an exceptional track record of quality and safety. MTF Biologics has processed over 100,000 donors and distributed over 10 million grafts for transplantation. MTF Biologics employs best in class donor processing and preparation to maintain the natural biomechanical and biochemical composition of each graft used.
